

JOSEPH ADEDEJI ADEWUNMI

32, Anuoluwapo Street, Igbopa, Ijede, Ikorodu, Lagos State, Nigeria

Email: adedejiosvaldo@gmail.com | Tel: (+234) 705-372-8566 LinkedIn: linkedin.com/in/joseph-adedewunmi | GitHub: github.com/Adedejiosvaldo

EDUCATION

2018 – 2023 Federal University of Technology, Akure (FUTA) | Ondo State, Nigeria *Bachelor of Technology (B.Tech) in Computer Science*

- **CGPA:** 4.16 / 5.00 (Second Class Upper Division)
- **Thesis Adviser:** Prof. A. O. Adetunmbi
- **Relevant Coursework:** Artificial Intelligence, Expert Systems, Cluster Computing, Data Structures & Algorithms, Theory of Computation, and Fault Tolerant Computing.

RESEARCH EXPERIENCE

2024 – Present Independent Applied Research | Principal Investigator

Project: *Startup Validator (Multi-Agent Systems)*

- Architected a **Multi-Agent System (MAS)** utilizing Google ADK and Gemini to simulate business validation workflows.
- Designed autonomous agent interactions (Critique Agent, Market Research Agent, VC Analysis Agent) to generate comprehensive feasibility reports without human intervention.
- **Focus:** Large Language Models (LLMs), Vector Databases, RAG Architectures.

2023 Federal University of Technology, Akure | *Undergraduate Researcher* **Advisor:** Prof. A. O. Adetunmbi **Project:** *Credit Card Fraud Detection using Deep Learning Models*

- Investigated the comparative efficiency of Convolutional Neural Networks (CNN) versus Long-Short-Term-Memory (LSTM) networks in detecting fraudulent financial transactions.
- Conducted extensive data preprocessing and feature engineering on high-dimensional financial datasets to address class imbalance.
- **Result:** Demonstrated specific trade-offs between training time and detection accuracy across differing neural architectures.

PROFESSIONAL EXPERIENCE

Nov 2024 – Present Solvium (Remote) | *Software Engineer (Backend & AI Systems)*

- **Distributed Systems:** Designed a high-concurrency architecture using FastAPI and Redis to support 3,000+ active users with sub-second latency.

- **AI Integration:** Implemented Retrieval-Augmented Generation (RAG) pipelines using Gemini AI for dynamic content generation.
- **Blockchain Interoperability:** Engineered a bridge between NEAR Protocol smart contracts and off-chain Python backends to ensure 99.99% reliability in transaction processing.

Feb 2024 – May 2024 Bloombyte | Backend Developer

- **Algorithmic Fairness:** Developed probability engines for stochastic gaming systems, ensuring mathematically provable fairness.
- **Optimization:** Achieved a 30% performance improvement in API response times through database indexing and caching strategies.

TEACHING AND LEADERSHIP EXPERIENCE

Feb 2025 – Present National Youth Service Corps (NYSC) | President, Information Technology CDS Group

- Lead community development initiatives focused on digital literacy.
- Design and facilitate technical workshops for corps members, teaching introductory programming and cloud concepts.

Sept 2024 – Feb 2025 National Youth Service Corps (NYSC) | Vice President, Information Technology CDS Group

- Coordinated technical training schedules and managed a team of peer-mentors.

2019 – 2023 MFM Campus Fellowship, FUTA | Public Relations Officer

- Managed communication channels and campus outreach strategies.
- Organized large-scale student events and coordinated volunteer teams.

FELLOWSHIPS AND ACADEMIC HONORS

2023 First Place (Team) | Tech 4Impact Competition, Google Developer Student Club, FUTA Chapter.

2022 – 2023 Dean's Honor List Awarded for academic excellence across four consecutive semesters.

TECHNICAL SKILLS

- **Languages:** Golang, Python (FastAPI), TypeScript (Node.js/NestJS), Solidity.
- **AI & ML:** LangChain, LangGraph, CrewAI, TensorFlow, PyTorch, RAG Architectures.
- **Cloud & DevOps:** Kubernetes (KCNA Certified), Docker, AWS, Google Cloud, CI/CD Pipelines.

- **Database:** PostgreSQL, MongoDB, Redis, Vector Databases.

CERTIFICATIONS

2025: Kubernetes and Cloud Native Associate (KCNA) – Linux Foundation

2025: Google Cybersecurity Professional Certificate – Google

2025: LangChain for LLM Application Development – DeepLearning.AI
